

Arduino Leonardo:

It can mimic keyboard and controller inputs and send to a PC.

Used for our Plate controller.

<https://arduinotech.dk/shop/leonardo-atmega32u4/> - Accessed 11/27/2022

Arduino Pro Micro:

More compact, but has no reset button.

Used for our Knife controller as Leonardo is too big to fit inside.

ADXL345 3-Axis Digital Acceleration of Gravity Tilt Module GY-291 3DOF:

This is a 3 degrees of freedom accelerometer.

The measuring range is $\pm 2g$ to $\pm 16g$.

It is used in both our Knife and Plate controllers.

HC-42 Bluetooth 5.0BLE module:

It uses Bluetooth 5.0 and BLE (Bluetooth Low Energy).

<https://arduinotech.dk/shop/hc-42-6pin-bluetooth-5-0ble-serial-port-module/> - Accessed 11/27/2022

Vibration motor:

It has a current of 0.06A and a voltage of 3V-4.5V.

It is used in our Plate controller for vibration feedback.

<https://arduinotech.dk/shop/vibrator-motor-0-06a-3v-4-5v/> - Accessed 11/27/2022

Force-sensing resistor:

It can be used to sense applied force in the range 100g to 10kg.

Used in our Knife controller.
