

Person 1

1. Do you always run the same routes?
 - Yes, I switch between a few routes.
2. What do you base your running routes on?
 - Distance.
3. Have you ever been in need of a new route to run? (like when you are in new place)
 - Yes, when I'm somewhere new.
4. Feedback on the application idea.
 - Cool idea! I have actually thought about missing something like that.

Person 2

1. Do you always run the same routes?
 - Not always. It varies. I keep to the neighborhood.
2. What do you base your running routes on?
 - The neighborhood, what she is used to.
3. Have you ever been in need of a new route to run? (new place)
 - Yes, if I am in a new place. Otherwise not.
4. Feedback on the application idea.
 - It is genius.

Person 3

1. Do you always run the same routes?
 - Yes, i think so.
2. What do you base your running routes on?
 - Elevation(not too steep) traffic (not too much), I would rather run in nature than in the city..
3. Have you ever been in need of a new route to run? (new place)
 - Yes, when I'm in a new place.
4. Feedback on the application idea.
 - Sounds like a smart idea. I have tried to find something like that, but haven't found anything which can change the route based on where you are and where you want to run.

Person 4

1. Do you always run the same routes?
 - No.
2. What do you base your running routes on?
 - Elevation, i like tailwind uphill and headwind when running downhill. But also headwind on the way out and tailwind on the way home. Run specific route when training for something.
3. Have you ever been in need of a new route to run? (new place)
 - No. If in a new place, runs randomly around as it's a good way to see the new place.
4. Feedback on the application idea.
 - Avoiding unsafe areas. Long flat stretches for sprinting. Ability to find runningmate. Prioritize different surfaces, asphalt, dirt etc.
