

1. Setup:

- If the participant does not have Android, we can provide them with one of our phones.
- Send the app to the participants so they can test it.
- APK link:
https://drive.google.com/file/d/1jTvuYgwTUyi8RzaVixHeOUJ_too9M1ZW/view?usp=share_link

2. Record audio of interviews:

3. Pre-interview: Record audio

1. Do you consent to your answers being used in our project?
2. How often do you engage in physical activities such as running, hiking, or cycling?
3. Are you as physically active as you would like to be?
4. Do you always run/walk the same routes?
5. What factors do you consider when choosing your routes?
6. Do you use a navigation tool for your trips?

4. Participant uses the app:

1. Create a non-explore mode route and walk it.
2. Create an explore mode, but click back to the main menu after reaching the page with the arrow.
3. Start a route from history and end the test after the arrow page has loaded the route.

5. After the route, have them fill out the SUS questionnaire

6. Post-interview: Record audio

1. How was it to generate a route with explore mode off?
2. How was it to generate a route with explore mode on?
3. Do you think this app can motivate you to run/walk? Why?
4. How was it to navigate to the different POIs?
5. How was it to use the phone for navigation?
6. Compared to when you normally run/walk, how was this experience?
7. What did you like most about this app?
8. What did you like least about this app?
9. Would you continue to use this route, or would you generate a new route next time?
10. How would you describe this app to a friend?
11. Is there any obvious functionality that this app is missing in your opinion?
